Chart 13 Monthly average APRC on forint loans for purchases of goods and the total amount of new business⁷

Chart 14 Monthly average APRC on Swiss franc car loans and the total amount of new business

⁷ Loans with floating interest rates or with up to 1 year initial rate fixation. Owing to the strong fluctuation of the series, seasonal adjustment did not provide an appreciable result. The high share of loans for purchases of goods with low APRC accounted for the low averages for the APRC in June and November 2009. Frequently, merchants pay a contribution to credit institutions in the case of loans for purchases of goods with low APRC. In such cases, the APRC does not include the amount of contribution paid by a merchant to a credit institution. Consequently, the start and close of credit offers may have a significant effect on the size of the average APRC.
