

PRESS RELEASE

Household and non-financial corporate sector interest rates: November 2012¹

According to seasonally unadjusted data, new business of forint-denominated housing loans and general purpose mortgage loans to the household sector increased slightly in November 2012. Average interest rates on forint loans to the non-financial corporate sector fell.

In November 2012, the average APRC on new forint-denominated housing loans and general purpose mortgage loans to the household sector fell relative to the previous month. New business of forint-denominated housing loans and general purpose mortgage loans increased slightly.²

The APRC³ on personal loans to the household sector fell slightly and new extensions declined sharply relative to the previous month.

Monthly average interest rates on forint deposits of the household sector fell, while those on euro deposits remained unchanged relative to October. New business of forint deposits increased and that of euro deposits was unchanged relative to the previous month.

¹ New loans to households and non-financial corporations do not include restructured loans. Similarly, the effects of government bridging loans are eliminated from the values of new housing loans and general purpose loans to households. (For more details, see the methodological notes.)

² Act XC of 2010, which prohibits banks from registering a mortgage under a foreign currency loan, entered into force on 14 August 2010. This has been reflected in a decline in foreign currency lending. The greater-than-zero amount of new foreign currency lending is explained by the opportunity to redenominate foreign currency loans disbursed earlier or transfer of debt. (For more details, see the methodological notes.)

³ Under Article 199 (1) of Act XCII of 1996, from 2 April 2012 the annual percentage rate of charge on loans to households may not be higher than the prevailing central bank base rate increased by 24 percentage points, with certain exceptions.

Monthly average interest rates on forint loans to the non-financial corporate sector of up to and over the equivalent of EUR 1 million fell, while those on euro loans of up to and over EUR 1 million rose.

New business of forint loans to the non-financial corporate sector of up to the equivalent of EUR 1 million fell slightly and that of forint loans of over the equivalent of EUR 1 million declined sharply. New extensions of euro loans of up to EUR 1 million remained unchanged and those of euro loans of over EUR 1 million fell relative to October.

Monthly average interest rates on non-financial corporations' forint deposits fell in November relative to the previous month, while those on euro deposits remained unchanged. New business of both forint and euro deposits decreased.
