PRESS RELEASE

Aggregated balance sheet of credit institutions: April 2011

As in the previous month, forint borrowing by households exceeded repayments in April, i.e. the sector was a net borrower, while repayments in foreign currency exceeded borrowing, i.e. the sector was a net repayer, according to not seasonally adjusted data. As a result, the stock of lending to households fell. There was a decline in forint deposits and an increase in foreign currency deposits in the month. Non-financial corporations were net borrowers in the forint; and they borrowed less in foreign currency than they repaid. Overall, their outstanding borrowing increased. Withdrawals from forint deposits exceeded inflows into deposits, and foreign currency deposits rose. On balance, non-financial corporations' total deposits increased relative to the previous month.

In April, the stock of outstanding household debt fell by HUF 20.6 billion due to transactions. Within this, forint borrowing exceeded repayments by HUF 19.9 billion and outstanding foreign currency borrowing fell by HUF 40.5 billion. The sector's deposits fell by HUF 4.4 billion due to transactions, reflecting net withdrawals from forint deposits of HUF 32.2 billion and net inflows into foreign currency deposits of HUF 27.8 billion.

The outstanding forint debt of non-financial corporations increased by HUF 42.3 billion due to transactions, while the stock of foreign currency loans fell by HUF 14.9 billion. Adjusted for the effects of revaluations and other changes, the sector's outstanding borrowing increased by HUF 37.1 billion. Non-financial corporations' deposits rose by HUF 35.1 billion due to transactions: net withdrawals from forint deposits amounted to HUF 14.9 billion and net inflows into foreign currency deposits amounted to HUF 50.0 billion.

In April, foreign liabilities of credit institutions accounted for 28.2% of the sector's balance sheet total.
