PRESS RELEASE

Aggregated balance sheet of credit institutions: August 2011

As in the previous month, forint borrowing by households exceeded repayments in August, i.e. the sector was a net borrower, while repayments in foreign currency exceeded borrowing, i.e. the sector was a net repayer, according to seasonally unadjusted data. As a result, the stock of lending to households (excluding revaluations and other volume changes) fell. Forint deposits rose due to transactions, while foreign currency deposits fell, with the result that the sector's total deposits increased. Non-financial corporations were net repayers in both the forint and foreign currency. In addition, they increased their forint deposits relative to the previous month and withdrew more from their foreign currency deposits than they placed. As a result, the sector's total deposits rose relative to July.

In August, the stock of outstanding household debt fell by HUF 31.9 billion due to transactions. Within this, forint borrowing exceeded repayments by HUF 10.5 billion and outstanding foreign currency borrowing (excluding revaluations and other volume changes) fell by HUF 42.4 billion. The sector's deposits rose by HUF 59.0 billion due to transactions, reflecting net inflows into forint deposits of HUF 86.4 billion and net withdrawals from foreign currency deposits of HUF 27.3 billion.

Outstanding forint debt of non-financial corporations fell by HUF 1.5 billion and their foreign currency debt by HUF 9.2 billion due to transactions. The stock of bonds issued by non-financial corporations and held by credit institutions increased by HUF 1.5 billion due to transactions. In aggregate, the sector's outstanding borrowing (excluding revaluations and other volume changes) fell by HUF 9.2 billion. Non-financial corporations' deposits increased by HUF 50.6 billion due to transactions: net inflows into forint deposits amounted to HUF 89.5 billion and withdrawals from foreign currency deposits amounted to HUF 38.8 billion.

In August, foreign liabilities of credit institutions accounted for 27.4% of the sector's balance sheet total.

* * * * *

The seasonally adjusted data are subject to more uncertainty than usual, due to fluctuations caused by the financial crisis.

MAGYAR NEMZETI BANK STATISTICS

One of the primary statutory duties of the Magyar Nemzeti Bank is to collect and publish statistical information. The statistical press release aims to help the reader understand the latest published data. The Quarterly Report on Inflation and the Report on Financial Stability, published periodically, contain the Bank's analyses of underlying economic processes and are accessible at www.mnb.hu.
