The Volatility of Capital Flows in Emerging Markets: Measures and Determinants, 07/03/2017	IMF
http://www.imf.org/~/media/Files/Publications/WP/2017/wp1741.ashx	Working Paper
Capital flow volatility is a concern for macroeconomic and financial stability. Nonetheless, literature is scarce in this topic. Our paper sheds light on this issue in two dimensions. First, using quarterly data for 65 countries over the period 1970Q1-2016Q1, we construct three measures of volatility, for total capital flows and key instruments. Second, we perform panel regressions to understand the determinants of volatility. The measures show that the volatility of all instruments is prone to bouts, rising sharply during global shocks like the taper tantrum episode. Capital flow volatility thus remains a challenge for policy makers. The regression results suggest that push factors can be more important than pull factors in explaining volatility, illustrating that the characteristics of volatility can be different from those of the flows levels. **Keywords: Volatility Estimation; International Flows; Financial Integration**

Examination of Liquidity of the Secondary Corporate Bond Markets - Final Report, 07/03/2017 http://www.iosco.org/library/pubdocs/pdf/IOSCOPD558.pdf

A report published today by the Board of the IOSCO has found no substantial evidence showing that liquidity in the secondary corporate bond markets between 2004 and 2015 has deteriorated markedly from historic norms for non-crisis periods. The report, titled Examination of Liquidity of the Secondary Corporate Bond Markets, presents a data-driven analysis of secondary corporate bond markets during 2004 and 2015, with a specific focus on liquidity. It provides a global view of corporate bond market development within the broader economic and financial context.

312d24b454912c773fe6	
On 2 December 2016 EIOPA released a Discussion Paper on the potential harmonisation of recovery and resolution (RR) frameworks for insurers1 ("the DP"). Following the consultation process, EIOPA will further develop its view on harmonising RR frameworks for insurers and might decide to publish an opinion addressed to the EU institutions on this topic. This response summarises the ESRB Secretariat staff views on the DP, with the aim of providing a macroprudential perspective.	
Consultation Paper - Recommendations on the coverage of entities in a group recovery plan,	EBA
02/03/2017	Consultation
http://www.eba.europa.eu/documents/10180/1770344/Consultation+Paper+on+recommendation+on	+
+coverage+of+entities+in+group+recovery+plans.pdf	Press Release
The EBA launched today a consultation on its draft Recommendation on the coverage of entities in banking group recovery plans, which is aimed at defining common criteria to identify entities (subsidiaries and branches) that need to be covered in group recovery plans, and the extent of such coverage. Such criteria should help institutions avoid a fragmented approach in providing information in recovery plans, and provide a common guidance for home and host supervisors. The consultation runs until 02 June 2017.

EU initiative on restrictions on payments in cash, 07/03/2017	EU
https://ec.europa.eu/info/content/eu-initiative-restrictions-payments-cash_en	Consultation
The Commission published on 2 February 2016 a Communication to the Council and the Parliament on	
an Action Plan to further step up the fight against the financing of terrorism. This Action Plan indicated	
that "Payments in cash are widely used in the financing of terrorist activities In this context the	
relevance of potential upper limits to cash payments could also be explored". In its Conclusions on the	

fight against terrorism, the Economic and Financial Affairs Council of 12 February 2016 also called on the Commission to explore the need for appropriate restrictions on cash payments exceeding certain thresholds. The purpose of the initiative under consideration is therefore to examine whether action at EU level is warranted and whether legislative or other measures stemming from such analysis should be initiated.

Risks to emerging market economies are high, including from higher corporate debt, rising non-performing loans and vulnerability to external shocks. Policy needs to manage risks, strengthen growth and ensure it is more inclusive. Countries should use increased fiscal space to implement effective fiscal initiatives that boost demand and make government taxes and spending more supportive of long-term growth and equity. A durable exit from the low-growth trap also requires greater political commitment to implement structural reform packages.

Boosting productivity in Mexico through integration into global value chains, 07/03/2017 http://www.oecd-ilibrary.org/economics/boosting-productivity-in-mexico-through-integration-into-global-value-chains_571d5b1f-en	OECD Working Paper
Mexico's structural reforms are already boosting productivity, but more can be done. This paper focuses on issues that have led to the success of the "modern" Mexico, and have led to difficulties with the "traditional" Mexico. These include the success of Global Value Chains (GVCs) in advancing the trade integration and linkages of key sectors, as well as how competition problems, excessive local regulation, and weak legal institutions have led to misallocation across firms. This paper examines in particular Mexico's successful integration into GVCs. OECD research suggests that GVC participation can bring economic benefits in terms of productivity, diversification and sophistication of production. Understanding what drives integration into GVCs provides policy guidance to support a wider integration.	
Keywords : International trade; global value chains; productivity; competition; misallocation.	
Is investment protectionism on the rise? 06/03/2017	OECD
http://www.oecd.org/investment/globalforum/2017-GFII-Background-Note-Is-investment-	Publication
protectionism-on-the-rise.pdf	
Evidence of investment protectionism tends to be anecdotal, given the difficulties in measuring the different ways a government might discriminate against foreign investors. The OECD FDI Regulatory Restrictiveness Index can help to shed light on the question.	
Behavioural Insights and Public Policy, Lessons from Around the World, 03/03/2017 http://www.oecd-ilibrary.org/governance/behavioural-insights-and-public-policy 9789264270480-en	OECD Publication
"Behavioural insights", or insights derived from the behavioural and social sciences, including decision making, psychology, cognitive science, neuroscience, organisational and group behaviour, are being applied by governments with the aim of making public policies work better. As their use has become more widespread, however, questions are being raised about their effectiveness as well as their philosophical underpinnings. This report discusses the use and reach of behavioural insights, drawing on a comprehensive collection of over 100 applications across the world and policy sectors, including consumer protection, education, energy, environment, finance, health and safety, labour market policies, public service delivery, taxes and telecommunications. It suggests ways to ensure that this experimental approach can be successfully and sustainably used as a public policy tool.	
Economic Survey of Australia 2017, 02/03/2017	OECD
http://www.oecd-ilibrary.org/economics/oecd-economic-surveys-australia-2017 eco surveys-aus- 2017-en	Publication +
Australia's economy has enjoyed considerable success in recent decades, reflecting strong macroeconomic policy, structural reform and the long commodity boom. The economy is now rebalancing following the end of the commodity boom, supported by an accommodative macroeconomic stance and currency depreciation. Low interest rates have supported aggregate demand but are ramping up investor risk taking and putting pressure on the housing market. Improving competition and other framework conditions that influence the absorption and development of innovation are key for restoring productivity growth. Innovation requires labour and capital markets that facilitate new business models. Productivity growth could be boosted through stronger collaboration between business and research sectors in R&D activity. Developing innovation-related skills will be important for the underprivileged and those displaced by economic restructuring and can help reduce gender wage gaps.	Opinion
