

Charts to the Press Release on the aggregated balance sheet of credit institutions, January 2014

Chart 1 Real growth of households' outstanding borrowing^{1, 2}

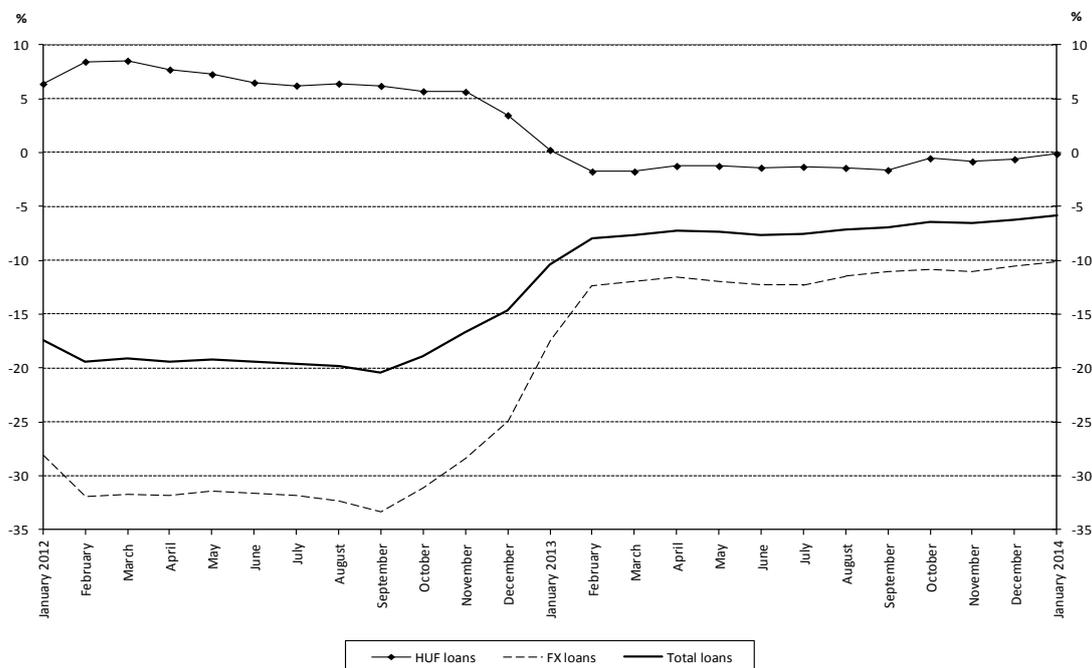

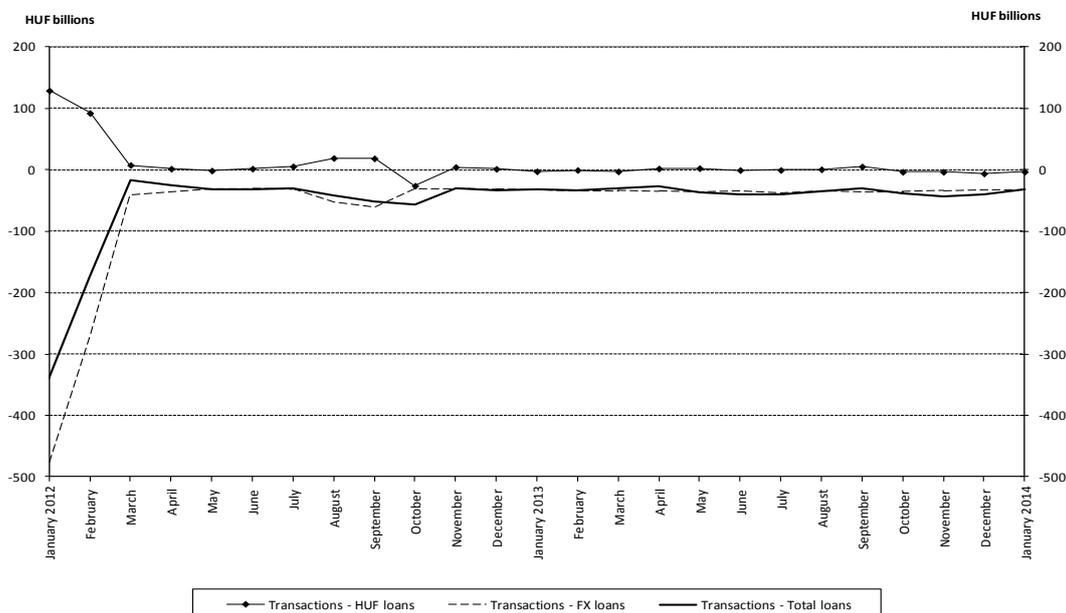

Chart 2 Seasonally and exchange rate adjusted net new borrowing by households³

¹ Transactions-based growth rate (see the Methodological notes).

² The large transaction volume of loans is attributable to early repayments: on 19 September 2011, Parliament passed Act CXXI of 2001 amending certain laws on home protection, which was brought into force on 29 September. Under the amendment, the law defined a range of consumers with foreign currency-denominated loans who could prepay, i.e. to repay in full, their existing debt at a fixed exchange rate which was lower than current market rates. Credit institutions provided loans for early repayment to make it easier for debtors to repay their existing debt.

³ The adjustments of seasonally adjusted transactions data due to early repayments are detailed in the Methodological notes.
