

Charts to the Press Release on household and non-financial corporate sector interest rates, August 2013

Chart 1 Values of new forint, euro and Swiss franc housing loans, based on not seasonally adjusted data¹

Chart 2 Monthly average APRC on forint housing loans and the total amount of new business^{1,2}

¹ Data on new business volumes of housing loans and general purpose mortgage loans for the period between October 2011 and February 2012 include new forint lending to households for the purposes of early repayments of foreign currency loans. This led to a significant increase in new business volumes between November 2011 and February 2012. Data on forint loans for debt consolidation are available as part of the statistical data published by the HFSZ at: www.pszaf.hu/Jelentések_Statistikák/Statistikák/Végtörlesztés/Végtörlesztés_stat.xls.

² During seasonal adjustment, the value of forint loans related to early repayments has been removed from the increase in new business in the period December 2011 – February 2012. Consequently, the seasonally adjusted series for the period is based on estimates (for more details, see the Methodological notes).

Chart 3 Values of new forint, euro and Swiss franc general purpose mortgage loans, based on not seasonally adjusted data³

Chart 4 Monthly average APRC on forint general purpose mortgage loans to households and the total amount of new business^{3, 4, 5}

³ Data on new business volumes of housing loans and general purpose mortgage loans for the period between October 2011 and February 2012 include new forint lending to households for the purposes of early repayments of foreign currency loans. This led to a significant increase in new business volumes between November 2011 and February 2012. Data on forint loans for debt consolidation are available as part of the statistical data published by the HFSA at: www.pszaf.hu/Jelentések_Statistikák/Statistikák/Végtörlesztés/Végtörlesztés_stat.xls.

⁴ Loans with floating interest rates or with up to 1 year initial rate fixation.

⁵ In performing seasonal adjustment, the value of forint loans related to early repayments has been removed from the increase in new business in the period November 2011 – February 2012. Consequently, the seasonally adjusted series for the period is based on estimates (for more details, see the Methodological notes).

Chart 5 Values of new forint, euro and Swiss franc personal loans, based on not seasonally adjusted data

Chart 6 Monthly average APRC on forint personal loans and the total amount of new business⁶

⁶ Under Article 199 (1) of Act XCII of 1996, from 2 April 2012 the annual percentage rate of charge on loans to households may not be higher than the prevailing central bank base rate increased by 24 percentage points, with certain exceptions. As a result, the monthly average annual percentage rate of charge on personal loans declined sharply in April 2012.

Chart 7 Monthly average APRC on forint loans for purchases of goods and the total amount of new business, based on not seasonally adjusted data⁷

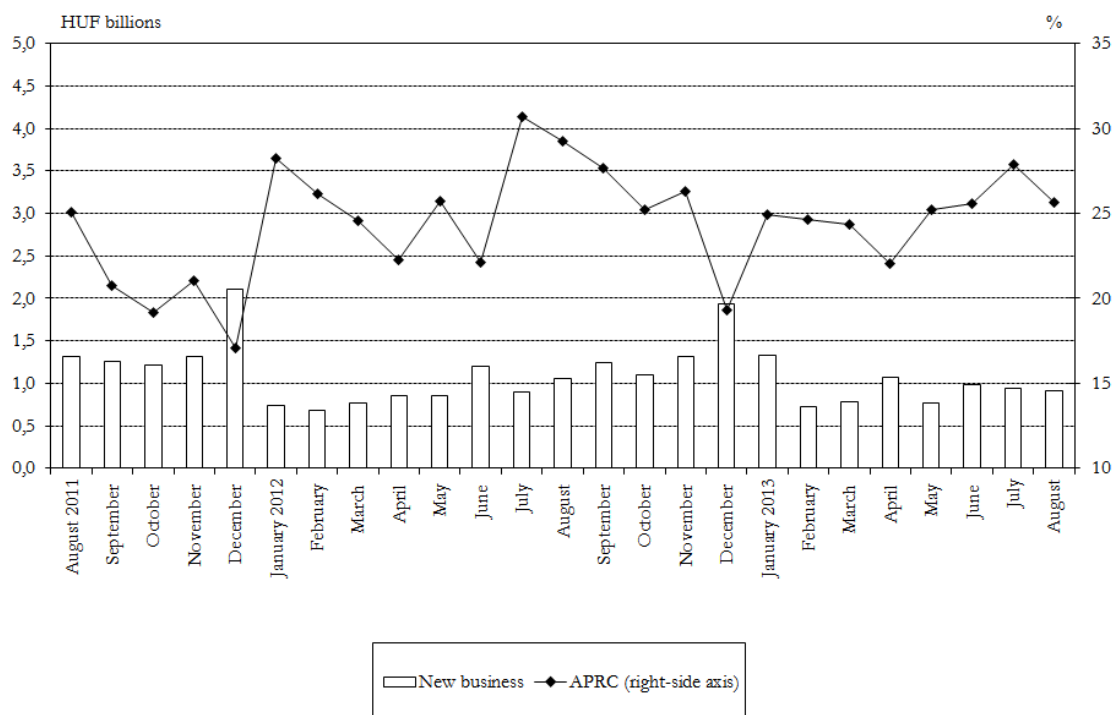

Chart 8 Monthly average APRC on forint car loans and the total amount of new business, based on not seasonally adjusted data

⁷ Loans with floating interest rates or with up to 1 year initial rate fixation. The high share of loans for purchases of goods with low APRC accounted for the low averages for the APRC in June and December 2011. Frequently, merchants pay a contribution to credit institutions in the case of loans for purchases of goods with low APRC. In such cases, the APRC does not include the amount of contribution paid by a merchant to a credit institution for the period to December 2011. However, from January 2012 the average APRC on loans for purchases of goods includes the amount of contribution paid by merchants to credit institutions in the case of 0% interest or 0% APRC schemes. The reason for the low reading of the APRC in December 2012 is that credit institutions primarily entered into loan contracts where they did not receive a contribution from outside parties.

Chart 9 Monthly average interest rate on forint loans to non-financial corporations up to the equivalent of EUR 1 million and the total amount of new business⁸

Chart 10 Monthly average interest rate on euro loans to non-financial corporations up to the equivalent of EUR 1 million and the total amount of new business

⁸ Loans with floating interest rates or with up to 1 year initial rate fixation.

Chart 11 Monthly average interest rate on forint loans to non-financial corporations over the equivalent of EUR 1 million and the total amount of new business^{9, 10}

Chart 12 Monthly average interest rate on euro loans to non-financial corporations over the equivalent of EUR 1 million and the total amount of new business⁹

⁹ Loans with floating interest rates or with up to 1 year initial rate fixation.

¹⁰ The significant increase in new lending to non-financial corporations in September 2011 was accounted for by lending by several banking groups to their subsidiaries.

Chart 13 Monthly average interest rate on household forint time deposits and the total amount of new business

Chart 14 Monthly average interest rate on household euro deposits with an agreed maturity of up to one year and the total amount of new business

Chart 15 Monthly average interest rates on non-financial corporations' forint deposits and the total amount of new business

Chart 16 Monthly average interest rates on non-financial corporations' euro deposits with a maturity of up to one year and the total amount of new business

Chart 17 Average overnight interbank rates, total interbank lending and the interest rate corridor
