

PRESS RELEASE

**Household and non-financial corporate sector interest rates:
March 2012¹**

According to seasonally unadjusted data, new business volumes of forint housing loans and general purpose mortgage loans to the household sector fell significantly in March 2012. New business volumes of euro deposits of the non-financial corporate sector of over the equivalent of EUR 1 million increased markedly.

In March 2012, the average APRC on new forint housing loans to the household sector fell slightly and that on general purpose mortgage loans rose significantly. New business volumes declined sharply,² mainly as a result of the termination of forint loan contracts related to the completion of the early repayment period. New business volume of forint personal loans increased relative to the previous month.

Monthly average interest rates on households' forint and euro deposits rose slightly. New business volumes of forint and euro deposits fell a little relative to the previous month.

¹ New loans to households and non-financial corporations do not include restructured loans. Similarly, the effects of government bridging loans are eliminated from the values of new housing loans and general purpose loans to households. (For more details, see the methodological notes.)

² Act XC of 2010, which prohibits banks from registering a mortgage under a foreign currency loan, entered into force on 14 August 2010. This has been reflected in a decline in foreign currency lending. The greater-than-zero amount of new foreign currency lending is explained by the opportunity to redenominate foreign currency loans disbursed earlier or transfer of debt. (For more details, see the methodological notes.)

The average APRC on forint loans to the non-financial corporate sector of up to the equivalent of EUR 1 million remained unchanged and that on forint loans of over the equivalent of EUR 1 million fell. The average APRC on euro loans to the non-financial corporate sector of up to the equivalent of EUR 1 million remained unchanged and that on euro loans of over the equivalent of EUR 1 million rose markedly relative to February.

New business of forint loans to the non-financial corporate sector of up to the equivalent of EUR 1 million rose slightly and that of forint loans to the non-financial corporate sector of over to the equivalent of EUR 1 million increased significantly. There was a slight increase in new business of forint loans of up to the equivalent of EUR 1 million and a significant increase in that of euro loans of over the equivalent of EUR 1 million relative to February.

Monthly average interest rates on non-financial corporations' forint and euro deposits remained unchanged and new business volumes of forint and euro deposits rose slightly relative to the previous month.
