PRESS RELEASE

Aggregated balance sheet of credit institutions: May 2012

In May 2012, households were net borrowers in the forint and net repayers in foreign currency, according to seasonally unadjusted data. As a result, the sector's outstanding borrowing fell. Households reduced their forint and foreign currency deposits in the month. Non-financial corporations were net repayers in the forint and foreign currency. Their forint deposits increased and their foreign currency deposits declined. As a result, the sector's total deposits rose relative to April.

In May, the stock of outstanding household debt fell by HUF 20.5 billion due to transactions. This reflected an increase of HUF 4.9 billion in forint loans and a decline of HUF 25.5 billion in foreign currency loans due to transactions. Total household deposits fell by HUF 21.3 billion due to transactions, reflecting net withdrawals from forint and foreign currency deposits of HUF 7.8 billion and HUF 13.6 billion respectively.

Outstanding forint and foreign currency debt of non-financial corporations fell by HUF 0.2 billion and HUF 7.6 billion respectively, excluding revaluations and other volume changes. The stock of bonds issued by the sector and held by credit institutions rose by HUF 0.1 billion due to transactions. As a result, the sector's outstanding borrowing fell by HUF 7.7 billion. Non-financial corporations' total deposits increased by HUF 109.3 billion, excluding revaluations and other volume changes: net inflows into forint deposits amounted to HUF 123.2 billion and net withdrawals from foreign currency deposits amounted to HUF 13.9 billion.

A [table](#), published in conjunction with this press release, contains further information on the monthly financing of households and non-financial corporations using preliminary statistical data on securities holdings, in addition to data reported by credit institutions.

In May, foreign liabilities of credit institutions accounted for 25.7% of the sector's balance sheet total.

* * * * *

The seasonally adjusted data are subject to more uncertainty than usual, due to fluctuations caused by the financial crisis.
